Subject index

Adsorbents
β-D-Glucosidase, Endo-1,4-β-D-glucanase, *Aspergillus fumigatus*; 48
Adsorption
Mucor flavus, Waste recovery, Insoluble compounds; 597
Adsorption inhibition
Trichoderma reesei, Cellulase, Lignocellulose; 341
Affinity chromatography
Antibody immobilization, DNA methylation, Polystyrene; 97
Aggregation extent
Trypsin, Thermodenaturation, Denaturation mechanism; 498
Air supply
Citric acid production, *Aspergillus niger*, Dissolved oxygen tension; 37
Alcohol dehydrogenase
Saccharomyces cerevisiae, Allenic alcohols; 279
Saccharomyces cerevisiae, Ethanol production, Invertase; 623
Sporotrichum pulverulentum, Enyme purification, Substrate specificity; 120
Algal cells, immobilized
Chlorella emersonii, Gel entrapment, Biocatalyst zonation; 729
Alginate
Fusarium moniliforme, Gibberellic acid production; 613
Invertase, Immobilization, Whole cell immobilization; 485
Nitrobacter agilis, Immobilization, Nitrate removal; 472
Yeast cells immobilized, D-Gluconо-1,5-lactone, Internal gelation; 145
Alginate immobilized
Klebsiella pneumoniae, 2,3-Butanediol, Whey permeate; 409
Alkaline protease
Bacillus licheniformis, Sporulation; 370
Conidiobolus, Immbolization, κ-Carrageenan; 632
Allenic alcohols
Alcohol dehydrogenase, *Saccharomyces cerevisiae*; 297
Amino acid hydrolysis
Pronase, *Streptomyces griseus*, Enantioselectivity, 241
Amino acid mediated stabilization
Bacillus brevis, Gramicidin S synthetase, Enzyme inactivation; 465
Aminohexylcellulose
Tannin immobilized, Protein adsorption, Metal adsorption; 130
Amylase activity
Aspergillus spp, Feedback inhibition, Catabolite repression; 659
α-Amylase
Starch hydrolysis, Kinetics, *Bacillus licheniformis*; 665
Streptomyces limosus, Ilulanase, Starch hydrolysis; 89
Amyloglucosidase
Glucose oxidase, Jackbean extract, Cross-linking agents; 686
Antiobiotics
Microalgae, Toxins, Plant growth regulators; 386
Antibody detachment
Immunochromatography, Cyanogen bromide activation; 681
Antibody immobilization
DNA methylation, Polystyrene, Affinity chromatography; 97
Apple distillery waste
Aspergillus niger, Mutants, Cellulase; 166
Applications
Fourier transform infrared spectroscopy, Monitoring biological processes; 568
Aqueous two-phase system
Hydroxypropyl starch, Enzyme purification; 417
Aryl acylamidase, *Pseudomonas fluorescens*, Partitioning; 183
Arthrobacter oxydans
Stereoselective reactions, Chiral liquid chromatography, *Nocardia* spp; 404
Artificial membranes
Immobilization, Enzyme immobilization, Whole cell immobilization; 450
Aryl acylamidase
Pseudomonas fluorescens, Aqueous two-phase system, Partitioning; 183
Ashbya gossypii
Eremotheclum ashbyii, Riboflavin production; 593
Aspen xylan
Trichoderma harzianum, Xylanase; 617
Aspergillus fumigatus
Fluorimetry, Exo-cellobiohydrolase, β-D-Glucosidase; 70
β-D-Glucosidase, Endo-1,4-β-D-glucanase, Adsorbents; 48
Aspergillus niger
Cell wall degradation, Chitinase, Glucanase; 588
Citric acid production, Dissolved oxygen tension, Air supply; 37
Citric acid production, Glycerol concentration, Isocitrate dehydrogenase; 258
Glycerol dehydrogenase, Glycerol synthesis, Citric acid accumulation; 607
Mutants, Cellulase, Apple distillery waste; 166
Mutants, Sugar-cane, Citric acid production; 469
Screening, Mutagenesis, Glucose oxidase production; 734

Aspergillus phoenicis
Cellulase, Mixed culture, *Trichoderma reesei*; 305
Aspergillus spp
Pectinase, Extracellular enzyme, Fed-batch culture; 541
Amylase activity, Feedback inhibition, Catabolite repression; 659
Aspergillus ustus
Cellobiohydrolase, *Trichoderma harzianum*, Cellulose; 141
ATP
Creatine kinase, Enzyme electrode; 349
ATP regeneration
Chromatophore stability, Radical formation Superoxide dismutase, 755
Pyruvate kinase, Lactate dehydrogenase, Immobilization; 153
Auxotroph
Plant cell variants, Temperature sensitive mutant, Conditional lethal mutant; 514

Bacillus brevis
Gramicidin S synthetase, Enzyme inactivation, Amino acid mediated stabilization; 465
Bacillus licheniformis
Alkaline protease, Sporulation; 370
Starch hydrolysis, α-Amylase, Kinetics; 665
Bacillus polymyxa
Molecular cloning, β-D-Xylosidase gene; 677
Bacillus spp
Recombinant DNA techniques, Carboxymethylcellulase gene, Gene expression; 725
Bacillus subtilis
Menthyl acetate, Two-liquid phase biocatalysis, Stereospecific hydrolysis; 53
Bacteria
Distillery waste, Enzyme activity; 412
Bacterial cell walls
Subcellular fractionation, Filtration; 93
Bacterial isolates
Lignin degradation, High performance liquid chromatography; 213
Bakers' yeast
β-D-Fructofuranosidase, Kinetics of extraction, Enzyme recovery; 81
Barbituric acid
Electrolytic cell, Chloroperoxidase, Hollow-fibre membrane reactor; 345
Benzo(*a*)pyrene degradation
Ligninase, *Phanerochaete chrysosporium*; 209
Bifunctional reagents
Xylopentadialdo-1,4-furanase, Enzyme immobilization; 293
Bioaffinity phenomena
Immobilization, Literature survey; 58, 125
Biocatalyst
Immobilization, Fluorochrome labelling, Fluorescence tomography; 115
Biocatalyst zonation
Chlorella emersonii, Gel entrapment, Algal cells, immobilized, 729
Biomass
Cellulose, Saccharification systems, Economics; 66
Biosensors
Biotransducers, Fibre optics; 651
Bioseparation
Reverse micelles, Downstream processing, Liquid–liquid extraction; 266
Biotransducers
Biosensors, Fibre optics; 651
Bivalent cations
D-Xylose isomerase, *Streptomyces violaceoruber*; 696

2,3-Butanediol
Klebsiella pneumoniae, Whey permeate, Alginate immobilized; 409

Candida acidothermophilum
Candida utilis, *Pachysolen tannophilus*, Pulp mill prehydrolysate; 610
Candida cylindracae
N-Methyllaurotetanine synthesis, Lipase, Diacetylboldine conversion; 161
Candida shehatae
Pichia stipitis, Xylose fermentation, Ethanol production; 360
Candida utilis
Candida acidothermophilum, *Pachysolen tannophilus*, Pulp mill prehydrolysate; 610
D-Galacturonic acid, Pectin, acid-hydrolysed, Symba process; 537
Carrageenan
Nitrobacter agilis, Immobilization, Nitrate removal; 477
Conidiobolus, Alkaline protease, Immobilization; 632
Carboxymethylcellulase gene
Recombinant DNA techniques, *Bacillus* spp, Gene expression, 725
Catabolite repression
Amylase activity, *Aspergillus* spp, Feedback inhibition; 659
Catalytic properties
Glucosephosphate isomerase, Covalent attachment, Stability; 222
Cell recycle
Whey permeate, *Lactobacillus bulgaricus*, Membrane reactor; 289
Cell suspension
Insect cells, Shear sensitivity; 33
Cell wall degradation
Aspergillus niger, Chitinase, Glucanase; 588
Cellobiohydrolase
Aspergillus ustus, *Trichoderma harzianum*, Cellulose; 141
Cellulose, *Dichomitus squalens*, Endo-1,4-β-D-glucanase; 22
Cellooligosaccharide
Cellulase, *Trichoderma koningii*, Transglycosylation activity; 227
Cellulase
Aspergillus niger, Mutants, Apple distillery waste; 166
Endo-1,4-β-D-glucanase, *Thermomonospora curvata*, Thermal activation; 205
Mixed culture, *Trichoderma reesei*, *Aspergillus phoenicis*; 305
Penicillium funiculosum, Mutants, Fermentation; 105
Sporotrichum cellulophilum, Membrane reactor; 691
Trichoderma koningii, Transglycosylation activity, Cellooligosaccharide; 227
Trichoderma reesei, Lignocellulose, Adsorption inhibition; 341
Xylanase, Fungal enzymes, Solid state fermentation; 178
Cellulase production
Talaromyces emersonii, Lactose containing media, Single cell protein; 749
Cellulose
Cellobiohydrolase, *Aspergillus ustus*, *Trichoderma harzianum*; 141
Dichomitus squalens, Endo-1,4-β-D-glucanase, Cellobiohydrolase; 22
Ethanol production, *Neurospora crassa*, Fermentation; 149
Saccharification systems, Economics, Biomass; 66
Trypsin, Immobilization, Kinetics; 109

Chemical oxygen demand
Distillery waste treatment, Sewage bacteria; 718
Chiral liquid chromatography
Stereoselective reactions, *Nocardia* spp, *Arthrobacter oxydans*; 404
Chitinase
Aspergillus niger, Cell wall degradation, Glucanase; 588
Chlorella emersonii
Gel entrapment, Biocatalyst zonation, Algal cells, immobilized; 729
Chloroform degradation
Pseudomonas putida, Enzyme electrode, Immobilization; 300
Chloroperoxidase
Electrolytic cell, Barbituric acid, Hollow-fibre membrane reactor; 345
Chloroplast membranes
Immobilization, Kinetics, Photochemical reaction; 533
Photosystem II, Fluorescence kinetics, Immobilization; 157
Chromatophore stability
ATP regeneration, Radical formation, Superoxide dismutase, 755
Citric acid accumulation
Aspergillus niger, Glycerol dehydrogenase, Glycerol synthesis; 607
Citric acid production
Aspergillus niger, Dissolved oxygen tension, Air supply; 37
Aspergillus niger, Glycerol concentration, Isocitrate dehydrogenase; 258
Aspergillus niger, Mutants, Sugar-cane; 469
Clostridium acetobutylicum
Xylanase, Hemicellulose substrate; 217
Conditional lethal mutant
Plant cell variants, Auxotroph, Temperature sensitive mutant; 514
Conidiobolus
Alkaline protease, Immobilization, κ-Carrageenan; 632
Continuous hydrolysis
Lipase, Olive oil hydrolysis, Membrane reactor; 236
Continuous stirred tank reactor
Laminar flow reactor, Plug flow reactor, Mathematical model; 627
Cotton
Penicillium funiculosum, Saccharification; 561
Covalent attachment
Glucosephosphate isomerase, Stability, Catalytic properties; 222
Creatine kinase
ATP, Enzyme electrode; 349
Crosslinking agents
Amyloglucosidase, Glucose oxidase, Jack-bean extract; 686
Culture collection
Germplasm, Fermentation, Taxonomy; 328
Cyanobacteria
Osmotic shock, Metabolite release; 101
Cyanogen bromide activation
Immunochromatography, Antibody detachment; 681

Dairy industry
Penicillium caseicolum, Protoplast fusion, Recombinants; 45
Penicillium strains, Protoplast fusion, Recombinants; 41
S-Dealkylation
Enzyme oxygenation, Sulphoxidation, Non-haem iron monooxygenase; 17
Denaturation mechanism
Trypsin, Thermodenaturation, Aggregation extent; 498

Desulfovibrio gigas
Hydrogen production, Hydrogenase reactor, Immobilization; 137
Diacetylboldine conversion
N-Methyllaurotetanine synthesis, Lipase, *Candida cylindracae*; 161
Dichlorophenoxyacetic acid
2,4-D degradation, Xenobiotic, Phenoxyalkanoic herbicides; 395
Dichomitus squalens
Cellulose, Endo-1,4-β-D-glucanase, Cellobiohydrolase; 22
Diosgenin
Furostanol glycosides, Fenugreek; 549
Disruption
Microbial cells, Intracellular enzymes; 194
Dissolved oxygen tension
Citric acid production, *Aspergillus niger*, Air supply; 37
Distillery waste
Bacteria, Enzyme activity; 412
Sewage bacteria, Chemical oxygen demand; 718
DNA methylation
Antibody immobilization, Polystyrene, Affinity chromatography; 97
Downstream processing
Bioseparation, Reverse micelles, Liquid–liquid extraction; 266
2,4-D degradation
Dichlorophenoxyacetic acid, Xenobiotic, Phenoxyalkanoic herbicides; 395

Economics
Cellulose, Saccharification systems, Biomass; 66
Electrolytic cell
Barbituric acid, Chloroperoxidase, Hollow-fibre membrane reactor; 345
Enantioselectivity
Pronase, *Streptomyces griseus*, Amino acid hydrolysis; 241
Endo-1,4-β-D-glucanase
Cellulase, *Thermomonospora curvata*, Thermal activation; 205
Cellulose, *Dichomitus squalens*, Cellobiohydrolase; 22
β-D-Glucosidase, *Aspergillus fumigatus*, Adsorbents; 48
Enzymatic processes
Water activity, Microbial processes; 322
Enzyme activity
Distillery waste, Bacteria; 412
Enzyme catalysed semisynthesis
β-Lactam antibiotics, Peptides, Nucleophilic deacylation; 4
Enzyme electrode
ATP, Creatine kinase; 349
Chloroform degradation, *Pseudomonas putida*, Immobilization; 300
Immobilization, Product transfer resistance, Glucose oxidase; 365
Enzyme immobilization
Artificial membranes, Immobilization, Whole cell immobilization; 450
Xylopentadialdo-1,4-furanase, Bifunctional reagents; 293
Enzyme inactivation
Bacillus brevis, Gramicidin S synthetase, Amino acid mediated stabilization; 465
Enzyme oxygenation
Sulphoxidation, S-Dealkylation, Non-haem iron monooxygenase; 17
Enzyme purification
Alcohol dehydrogenase, *Sporotrichum pulverulentum*, Substrate specificity; 120
Aqueous two-phase system, Hydroxypropyl starch; 417
Enzyme recovery
β-D-Fructofuranosidase, Bakers' yeast, Kinetics of extraction; 81
Epoxidation
1,7-Octadiene, *Pseudomonas putida*, Two-liquid phase biocatalysis; 85
Eremothecium ashbyii
Ashbya gossypii, Riboflavin production; 593
Ethanol
Pichia stipitis, Xylose, Oak acid prehydrolysate; 439
Ethanol fermentation
Saccharomyces cerevisiae, Glycerol production, Water activity; 461
Ethanol production
Candida shehatae, *Pichia stipitis*, Xylose fermentation; 360
Cellulose, *Neurospora crassa*, Fermentation; 149
Jerusalem artichoke, Fermentation, *Kluyveromyces fragilis*; 673
Saccharomyces cerevisiae, Invertase, Alcohol dehydrogenase; 623
Sugar-cane, Ex-Ferm process; 491
Sugar-cane, *Saccharomyces* sp, Skim milk supplement; 481
Exo-cellobiohydrolase
Fluorimetry, β-D-Glucosidase, *Aspergillus fumigatus*; 70
Extracellular enzyme
Aspergillus sp, Pectinase, Fed-batch culture; 541
Ex-Ferm process
Ethanol production, Sugar-cane; 491

Fed-batch culture
Aspergillus sp, Pectinase, Extracellular enzyme; 541
Feedback inhibition
Amylase activity, *Aspergillus* spp, Catabolite repression; 659
Fenugreek
Diosgenin, Furostanol glycosides; 549
Fermentation
Cellulase, *Penicillium funiculosum*, Mutants; 105
Cellulose, Ethanol production, *Neurospora crassa*; 149
Culture collection, Germplasm, Taxonomy; 328
Jerusalem artichoke, Ethanol production, *Kluyveromyces fragilis*; 673
Polyhydroxy alcohols, Thin layer chromatography; 424
Polyhydroxy alcohols, Thin layer chromatography, Flame ionization detection; 427
Yeast, immobilized, Gel entrapment, Internal gelation; 737
Fermentation productivity
Recombinant DNA techniques, Plasmid stability, Mathematical model; 706
Fibre optics
Biosensors, Biotransducers; 651
Filtration
Bacterial cell walls, Subcellular fractionation; 93
Flame ionization detection
Polyhydroxy alcohols, Fermentation, Thin layer chromatography; 427
Fluorescence kinetics
Chloroplast membranes, Photosystem II, Immobilization; 157
Fluorescence tomography
Biocatalyst, Immobilization, Fluorochrome labelling; 115
Fluorimetry
Exo-cellobiohydrolase, β-D-Glucosidase, *Aspergillus fumigatus*; 70
Fluorochrome labelling
Biocatalyst, Immobilization, Fluorescence tomography; 115
Formate dehydrogenase
NAD^+, macromolecular, Glutamate dehydrogenase, Glucose dehydrogenase; 556
Fourier transform infrared spectroscopy
Monitoring biological processes, Applications; 568
β-D-Fructofuranosidase
Bakers' yeast, Kinetics of extraction, Enzyme recovery; 81
Fungal enzymes
Cellulase, Xylanase, Solid state fermentation; 178
Furostanol glycosides
Diosgenin, Fenugreek; 549
Fusarium moniliforme
Alginate, Gibberellic acid production; 613

D-Galacturonic acid
Candida utilis, Pectin, acid-hydrolysed, Symba process; 537
Gel entrapment
Chlorella emersonii, Biocatalyst zonation, Algal cells, immobilized; 729
Yeast, immobilized, Fermentation, Internal gelation; 737
Gene expression
Recombinant DNA techniques, Carboxymethylcellulase gene, *Bacillus* spp; 725
Germplasm
Culture collection, Fermentation, Taxonomy; 328
Gibberellic acid production
Fusarium moniliforme, Alginate; 613
Glucanase
Aspergillus niger, Cell wall degradation, Chitinase; 588
D-Glucono-1,5-lactone
Alginate, Yeast cells immobilized, Internal gelation; 145
Glucose dehydrogenase
NAD^+, macromolecular, Glutamate dehydrogenase, Formate dehydrogenase; 556
Glucose oxidase
Amyloglucosidase, Jackbean extract, Crosslinking agents; 686
Immobilization, Enzyme electrode, Product transfer resistance; 365
Glucose oxidase production
Aspergillus niger, Screening, Mutagenesis; 734
Glucosephosphate isomerase
Covalent attachment, Stability, Catalytic properties; 222
β-D-Glucosidase
Endo-1,4-β-D-glucanase, *Aspergillus fumigatus*, Adsorbents; 48
Fluorimetry, Exo-cellobiohydrolase, *Aspergillus fumigatus*; 70
Glutamate dehydrogenase
NAD^+, macromolecular, Formate dehydrogenase, Glucose dehydrogenase; 556
Glyceride synthesis
Rhizopus delemar, Lipase; 429
Glycerol concentration
Citric acid production, *Aspergillus niger*, Isocitrate dehydrogenase; 258
Glycerol dehydrogenase
Aspergillus niger, Glycerol synthesis, Citric acid accumulation; 607
Glycerol production
Saccharomyces cerevisiae, Ethanol fermentation, Water activity; 461

Glycerol synthesis
Aspergillus niger, Glycerol dehydrogenase, Citric acid accumulation; 607
Gramicidin S synthetase
Bacillus brevis, Enzyme inactivation, Amino acid mediated stabilization; 465
Growth kinetics
Plant cell culture, Recombinant DNA, Scale up; 260

Haemproteins
Lignin biodegradation, *Phanerochaete chrysosporium*, Veratryl alcohol; 27
Heat stable enzymes
Xylanase, Thermophilic bacteria, Sewage sludge; 309
Hemicellulose substrate
Xylanase, *Clostridium acetobutylicum*; 217
High performance liquid chromatography
Lignin degradation, Bacterial isolates; 213
Hollow-fibre membrane reactor
Electrolytic cell, Barbituric acid, Chloroperoxidase; 345
Hydrogen production
Hydrogenase reactor, *Desulfovibrio gigas*, Immobilization; 137
Hydrogenase reactor
Hydrogen production, *Desulfovibrio gigas*, Immobilization; 137
Hydroxypropyl starch
Aqueous two-phase system, Enzyme purification; 417

Immobilization
Mass transfer modelling, Propene oxide inhibition, Propene epoxidation; 334
Artificial membranes, Enzyme immobilization, Whole cell immobilization; 450
ATP regeneration, Pyruvate kinase, Lactate dehydrogenase; 153
Bioaffinity phenomena, Literature survey; 58, 125
Biocatalyst, Fluorochrome labelling, Fluorescence tomography, 115
Chloroform degradation, *Pseudomonas putida*, Enzyme electrode; 300
Chloroplast membrane, Kinetics, Photochemical reaction; 533
Chloroplast membranes, Photosystem II, Fluorescence kinetics; 157
Conidiobolus, Alkaline protease, κ-Carrageenan; 632
Enzyme electrode, Product transfer resistance, Glucose oxidase; 365
Hydrogen production, Hydrogenase reactor, *Desulfovibrio gigas*; 137
Invertase, Alginate, Whole cell immobilization; 485
Milk coagulation; 642
Mycobacterium cells, Mass transfer modelling, Propene epoxidation; 281
Nitrobacter agilis, Alginate, Nitrite removal; 472
Nitrobacter agilis, Carrageenan, Nitrite removal; 477
Porous support, Mathematical model; 433
Trypsin, Cellulose, Kinetics; 109
Immobilized cells
Nomenclature recommendations (EFB), Metabolic behaviour; 315
Immunochromatography
Antibody detachment, Cyanogen bromide activation; 681
Insect cells
Shear sensitivity, Cell suspension; 33
Insoluble compounds
Mucor flavus, Adsorption, Waste recovery; 597
Internal gelation
Alginate, Yeast cells immobilized, D-Glucono-1,5-lactone; 145
Yeast, immobilized, Fermentation, Gel entrapment; 737
Intracellular enzymes
Microbial cells, Disruption; 194
Invertase
Immobilization, Alginate, Whole cell immobilization; 485
Saccharomyces cerevisiae, Ethanol production, Alcohol dehydrogenase; 623
Isocitrate dehydrogenase
Citric acid production, *Aspergillus niger*, Glycerol concentration; 258

Jackbean extract
Amyloglucosidase, Glucose oxidase, Crosslinking agents; 686
Jerusalem artichoke
Fermentation, Ethanol production, *Kluyveromyces fragilis*; 673

Kinetics
Chloroplast membrane, Immobilization, Photochemical reaction; 533
Starch hydrolysis, α-Amylase, *Bacillus licheniformis*; 665
Trypsin, Immobilization, Cellulose; 109
Kinetics of extraction
β-D-Fructofuranosidase, Bakers' yeast, Enzyme recovery; 81
Klebsiella pneumoniae
2,3-Butanediol, Whey permeate, Alginate immobilized; 409
Kluyveromyces fragilis
Jerusalem artichoke, Fermentation, Ethanol production; 673

Laccase
Rhizoctonia praticola, Phenolic pollutants, Soil enzymes; 171
β-Lactam antibiotics
Peptides, Enzyme catalysed semi-synthesis, Nucleophilic deacylation; 4
Lactate dehydrogenase
ATP regeneration, Pyruvate kinase, Immobilization; 153
Lactobacillus bulgaricus
Whey permeate, Membrane reactor, Cell recycle; 289
Lactose containing media
Cellulase production, *Talaromyces emersonii*, Single cell protein; 749
Laminar flow reactor
Continuous stirred tank reactor, Plug flow reactor, Mathematical model; 627
Larchwood
Xylanase, Xylosidase, Oat spelt; 373
Large scale isolation
Rhizopus nigricans, Progesterone 11α-hydroxylase; 546
Lignin degradation
Phanerochaete chrysosporium, Haemproteins, Veratryl alcohol; 27
High performance liquid chromatography, Bacterial isolates; 213
Phanerochaete chrysosporium, Mutants, Wood decay; 75
Ligninase
Benzo(*a*)pyrene degradation, *Phanerochaete chrysosporium*; 209
Lignocellulose
Trichoderma reesei, Cellulase, Adsorption inhibition; 341
Lipase
N-Methyllaurotetanine synthesis, *Candida cylindracae*, Diacetylboldine conversion; 161
Olive oil hydrolysis, Membrane reactor, Continuous hydrolysis; 236
Rhizopus delemar, Glyceride synthesis; 429
Liquid–liquid extraction
Bioseparation, Reverse micelles, Downstream processing; 266

Mass transfer modelling
Mycobacterium cells, Immobilization, Propene epoxidation; 281
Propene oxide inhibition, Propene epoxidation, Immobilization; 334
Mathematical model
Continuous stirred tank reactor, Laminar flow reactor, Plug flow reactor; 627
Immobilization, Porous support; 433
Recombinant DNA techniques, Fermentation productivity, Plasmid stability; 706
Membrane reactor
Lipase, Olive oil hydrolysis, Continuous hydrolysis; 236
Sporotrichum cellulophilum, Cellulase; 691
Whey permeate, *Lactobacillus bulgaricus*, Cell recycle; 289
Menthyl acetate
Bacillus subtilis, Two-liquid phase biocatalysis, Stereospecific hydrolysis; 53
Metabolic behaviour
Nomenclature recommendations (EFB), Immobilized cells; 315
Metabolite release
Cyanobacteria, Osmotic shock; 101
Metal adsorption
Tannin immobilized, Protein adsorption, Aminohexylcellulose; 130
Methanogenic bacteria
Sludges, *Methanothrix soehngenii*; 601
Methanothrix soehngenii
Sludges, Methanogenic bacteria; 601
N-Methyllaurotetanine synthesis
Lipase, *Candida cylindracae*, Diacetylboldine conversion; 161
Microalgae
Toxins, Antibiotics, Plant growth regulators; 386
Microbial cells
Disruption, Intracellular enzymes; 194
Microbial processes
Water activity, Enzymatic processes; 322
Milk coagulation
Immobilization; 642
Mixed culture
Cellulase, *Trichoderma reesei*, *Aspergillus phoenicis*; 305
Molecular cloning
β-D-Xylosidase gene, *Bacillus polymyxa*; 677
Monitoring biological processes
Fourier transform infrared spectroscopy, Applications; 568
Mucor flavus
Adsorption, Waste recovery, Insoluble compounds; 597
Mutagenesis
Aspergillus niger, Screening, Glucose oxidase production; 734
Mutants
Aspergillus niger, Cellulase, Apple distillery waste; 166
Aspergillus niger, Sugar-cane, Citric acid production; 469
Cellulase, *Penicillium funiculosum*, Fermentation; 105
Lignin degradation, *Phanerochaete chrysosporium*, Wood decay; 75

Mycobacterium cells
Immobilization, Mass transfer modelling, Propene epoxidation; 281

NAD⁺ macromolecular
Glutamate dehydrogenase, Formate dehydrogenase, Glucose dehydrogenase; 556
Neurospora crassa
Cellulose, Ethanol production, Fermentation; 149
Nitrite removal
Nitrobacter agilis, Alginate, Immobilization; 472
Nitrobacter agilis, Carrageenan, Immobilization; 477
Nitrobacter agilis
Alginate, Immobilization, Nitrite removal; 474
Carrageenan, Immobilization, Nitrite removal; 477
Nocardia spp
Stereoselective reactions, Chiral liquid chromatography, *Arthrobacter oxydans*; 404
Nomenclature recommendations (EFB)
Immobilized cells, Metabolic behaviour; 315
Non-haem iron monooxygenase
Enzyme oxygenation, Sulphoxidation, S-Dealkylation; 17
Nucleophilic deacylation
β-Lactam antibiotics, Peptides, Enzyme catalysed semisynthesis; 4

Oak acid prehydrolysate
Pichia stipitis, Xylose, Ethanol; 439
Oat spelt
Xylanase, Xylosidase, Larchwood; 373
1,7-Octadiene
Epoxidation, *Pseudomonas putida*, Two-liquid phase biocatalysis; 85
Olive oil hydrolysis
Lipase, Membrane reactor, Continuous hydrolysis; 236
Osmotic shock
Cyanobacteria, Metabolite release; 101
Oxygen
Pachysolen tannophilus, Xylose fermentation, Redox potential; 503

Pachysolen tannophilus
Candida utilis, Candida acidothermophilum, Pulp mill prehydrolysate; 610
Pentose phosphate pathway, Xylose fermentation; 353
Xylose fermentation, Oxygen, Redox potential; 503
Partitioning
Aryl acylamidase, *Pseudomonas fluorescens*, Aqueous two-phase systems; 183
Patent reports; 60, 245, 317, 378, 445, 508, 578, 635, 701, 751
Pectinase
Aspergillus sp, Extracellular enzyme, Fed-batch culture; 541
Pectin, acid-hydrolysed
Candida utilis, D-Galacturonic acid, Symba process; 537
Penicillium caseicolum
Protoplast fusion, Recombinants, Dairy industry; 45
Penicillium funiculosum
Cellulase, Mutants, Fermentation; 105
Saccharification, Cotton; 561
Penicillium pinophilum
Trichoderma viride, Protoplast formation and regeneration; 527
Penicillium strains
Protoplast fusion, Dairy industry, Recombinants; 41
Pentose phosphate pathway
Pachysolen tannophilus, Xylose fermentation; 353
Peptides
β-Lactam antibiotics, Enzyme catalysed semisynthesis, Nucleophilic deacylation; 4
Phanerochaete chrysosporium
Benzo(*a*)pyrene degradation, Ligninase; 209
Lignin biodegradation, Haemproteins, Veratryl alcohol; 27
Lignin degradation, Mutants, Wood decay; 75
Phenolic pollutants
Laccase, *Rhizoctonia praticola*, Soil enzymes; 171
Phenoxyalkanoic herbicides
2,4-D degradation, Dichlorophenoxyacetic acid, Xenobiotic; 395
Photochemical reaction
Chloroplast membrane, Immobilization, Kinetics; 533
Photosystem II
Chloroplast membranes, Fluorescence kinetics, Immobilization; 157
Pichia stipitis
Candida shehatae, Xylose fermentation, Ethanol production; 360
Xylose, Ethanol, Oak acid prehydrolysate; 439
Plant cell culture
Plant cell variants, Secondary products; 578
Recombinant DNA, Scale up, Growth kinetics; 260
Plant cell variants
Auxotroph, Temperature sensitive mutant, Conditional lethal mutant; 514
Plant cell culture, Secondary products; 578
Plant growth regulators
Microalgae, Toxins, Antibiotics; 386
Plasmid stability
Recombinant DNA techniques, Fermentation productivity, Mathematical model; 706
Plug flow reactor
Continuous stirred tank reactor, Laminar flow reactor, Mathematical model; 627
Polyhydroxy alcohols
Fermentation, Thin layer chromatography, Flame ionization detection; 427
Fermentation, Thin layer chromatography; 424
Polystyrene
Antibody immobilization, DNA methylation, Affinity chromatography; 97
Pore size distribution
Steam explosion pretreatment, Wood hydrolysis; 274
Porous support
Immobilization, Mathematical model; 433
Product transfer resistance
Immobilization, Enzyme electrode, Glucose oxidase; 365
Progesterone 11α-hydroxylase
Rhizopus nigricans, Large scale isolation; 546
Pronase
Streptomyces griseus, Amino acid hydrolysis, Enantioselectivity; 241
Propene epoxidation
Mass transfer modelling, Propene oxide inhibition, Immobilization; 334
Mycobacterium cells, Immobilization, Mass transfer modelling; 281
Propene oxide inhibition
Mass transfer modelling, Propene epoxidation, Immobilization; 334
Protein adsorption
Tannin immobilized, Metal adsorption, Aminohexylcellulose; 130
Protoplast formation and regeneration
Penicillium pinophilum, Trichoderma viride; 527
Protoplast fusion
Penicillium caseicolum, Recombinants, Dairy industry; 45
Penicillium strains, Dairy industry, Recombinants; 41
Pseudomonas fluorescens
Aryl acylamidase, Aqueous two-phase systems, Partitioning; 183
Pseudomonas putida
Chloroform degradation, Enzyme electrode, Immobilization; 300
1,7-Octadiene, Epoxidation, Two-liquid phase biocatalysis; 85
Pullulanase
Streptomyces limosus, α-Amylase Starch hydrolysis; 89
Thermus aquaticus; 668
Pulp mill prehydrolysate
Candida utilis, Candida acidothermophilum, Pachysolen tannophilus; 610
Pyruvate kinase
ATP regeneration, Lactate dehydrogenase, Immobilization; 153

Radical formation
Chromatophore stability, ATP regeneration, Superoxide dismutase; 755
Recombinant DNA
Plant cell culture, Scale up, Growth kinetics; 260
Carboxymethylcellulase gene, *Bacillus* spp, Gene expression; 725
Fermentation productivity, Plasmid stability, Mathematical model; 706
Recombinants
Penicillium caseicolum, Protoplast fusion, Dairy industry; 45
Penicillium strains, Protoplast fusion, Dairy industry; 41
Redox potential
Pachysolen tannophilus, Xylose fermentation, Oxygen; 503
Reverse micelles
Bioseparation, Downstream processing, Liquid–liquid extraction; 266
Rhizoctonia praticola
Laccase, Phenolic pollutants, Soil enzymes; 171
Rhizopus delemar
Lipase, Glyceride synthesis; 429
Rhizopus nigricans
Progesterone 11α-hydroxylase, Large scale isolation; 546
Riboflavin production
Eremothecium ashbyii, Ashbya gossypii; 593

Saccharification
Penicillium funiculosum, Cotton; 561
Saccharification systems
Cellulose, Economics, Biomass; 66
Saccharomyces cerevisiae
Alcohol dehydrogenase, Allenic alcohols; 297
Ethanol fermentation, Glycerol production, Water activity. 461
Ethanol production, Invertase, Alcohol dehydrogenase; 623
Saccharomyces sp
Ethanol production, Sugar-cane, Skim milk supplement; 481
Scale up
Plant cell culture, Recombinant DNA, Growth kinetics; 260

Screening
Aspergillus niger, Mutagenesis, Glucose oxidase production; 734
Secondary products
Plant cell culture, Plant cell variants; 578
Serine hydroxymethyltransferase
L-Tyrosine, β-Tyrosinase; 523
Sewage
Distillery waste treatment, Chemical oxygen demand; 718
Xylanase, Thermophilic bacteria, Heat stable enzymes; 309
Shear sensitivity
Insect cells, Cell suspension; 33
Single cell protein
Cellulase production, *Talaromyces emersonii*, Lactose containing media; 749
Skim milk supplement
Ethanol production, Sugar-cane, *Saccharomyces* sp; 481
Sludges
Methanogenic bacteria, *Methanothrix soehngenii*; 601
Soil enzymes
Laccase, *Rhizoctonia praticola*, Phenolic pollutants; 171
Solid state fermentation
Cellulase, Xylanase, Fungal enzymes; 178
Sporotrichum cellulophilum
Cellulase, Membrane reactor; 691
Sporotrichum pulverulentum
Alcohol dehydrogenase, Enzyme purification, Substrate specificity; 120
Sporulation
Bacillus licheniformis, Alkaline protease; 370
Stability
Glucosephosphate isomerase, Covalent attachment, Catalytic properties; 222
Starch hydrolysis
α-Amylase, Kinetics, *Bacillus licheniformis*; 665
Streptomyces limosus, α-Amylase, Pullulanase; 89
Steam explosion pretreatment
Wood hydrolysis, Pore size distribution; 274
Stereoselective reactions
Chiral liquid chromatography, *Nocardia* spp, *Arthrobacter oxydans*; 404
Stereospecific hydrolysis
Bacillus subtilis, Menthyl acetate, Two-liquid phase biocatalysis; 53
Streptomyces griseus
Pronase, Amino acid hydrolysis, Enantioselectivity; 241
Streptomyces limosus
α-Amylase, Pullulanase, Starch hydrolysis; 89
Streptomyces violaceoruber
D-Xylose isomerase, Bivalent cations; 696
Subcellular fractionation
Bacterial cell walls, Filtration; 93
Substrate specificity
Alcohol dehydrogenase, *Sporotrichum pulverulentum*, Enzyme purification; 120
Sugar-cane
Aspergillus niger, Mutants, Citric acid production; 469
Ethanol production, Ex-Ferm process; 491
Ethanol production, *Saccharomyces* sp, Skim milk supplement; 481
Sulphoxidation
Enzyme oxygenation, S-Dealkylation, Non-haem iron monooxygenase; 17
Superoxide dismutase
Chromatophore stability, ATP regeneration, Radical formation; 755
Symba process
Candida utilis, D-Galacturonic acid, Pectin, acid-hydrolysed; 537

Talaromyces emersonii
Cellulase production, Lactose containing media, Single cell protein; 749
Tannin immobilized
Protein adsorption, Metal adsorption, Aminohexylcellulose; 130
Taxonomy
Culture collection, Germplasm, Fermentation; 328
Temperature sensitive mutant
Plant cell variants, Auxotroph, Conditional lethal mutant; 514
Thermal activation
Endo-1,4-β-D-glucanase, Cellulase, *Thermomonospora curvata*; 205
Thermodenaturation
Trypsin, Aggregation extent, Denaturation mechanism; 498
Thermomonospora curvata
Endo-1,4-β-D-glucanase, Cellulase, Thermal activation; 205
Thermophilic bacteria
Xylanase, Heat stable enzymes, Sewage sludge; 309
Thermus aquaticus
Pullulanase; 668
Thin layer chromatography
Polyhydroxy alcohols, Fermentation, Flame ionization detection; 427
Polyhydroxy alochols, Fermentation; 424
Toxins
Microalgae, Antibiotics, Plant growth regulators; 386
Transglycosylation activity
Cellulase, *Trichoderma koningii*, Cellooligosaccharide; 227
Trichoderma harzianum
Cellobiohydrolase, *Aspergillus ustus*, Cellulose; 141
Xylanase, Aspen xylan; 617
Trichoderma koningii
Cellulase, Transglycosylation activity, Cellooligosaccharide; 227
Trichoderma reesei
Cellulase, Lignocellulose, Adsorption inhibition; 341
Cellulase, Mixed culture, *Aspergillus phoenicis*; 305
Trichoderma viride
Penicillium pinophilum, Protoplast formation and regeneration; 527
Trypsin
Immobilization, Cellulose, Kinetics; 109
Thermodenaturation, Aggregation extent, Denaturation mechanism; 498
Two-liquid phase biocatalysis
Bacillus subtilis, Menthyl acetate, Stereospecific hydrolysis; 53
1,7-Octadiene, Epoxidation, *Pseudomonas putida*; 85
β-Tyrosinase
L-Tyrosine, Serine hydroxymethyltransferase; 523
L-Tyrosine
β-Tyrosinase, Serine hydroxymethyltransferase; 523
Veratryl alcohol
Lignin biodegradation, *Phanerochaete chrysosporium*, Haemproteins; 27

Waste recovery
Mucor flavus, Adsorption, Insoluble compounds; 597
Water activity
Microbial processes, Enzymatic processes; 322
Saccharomyces cerevisiae, Ethanol fermentation, Glycerol production; 461
Whey permeate
Klebsiella pneumoniae, 2,3-Butanediol, Alginate immobilized; 409
Lactobacillus bulgaricus, Membrane reactor, Cell recycle; 289
Whole cell immobilization
Artificial membranes, Immobilization, Enzyme immobilization; 450
Invertase, Immobilization, Alginate; 485
Wood decay
Lignin degradation, *Phanerochaete chrysosporium*, Mutants; 75
Wood hydrolysis
Steam explosion pretreatment, Pore size distribution; 274

Xenobiotic
2,4-D degradation, Dichlorophenoxyacetic acid, Phenoxyalkanoic herbicides; 395
Xylanase
Cellulase, Fungal enzymes, Solid state fermentation; 178
Clostridium acetobutylicum, Hemicellulose substrate; 217
Thermophilic bacteria, Heat stable enzymes, Sewage sludge; 309
Trichoderma harzianum, Aspen xylan; 617
Xylosidase, Larchwood, Oat spelt; 373
Xylopentadialdo-1,4-furanase
Enzyme immobilization, Bifunctional reagents; 293
Xylose
Pichia stipitis, Ethanol, Oak acid prehydrolysate; 439
Xylose fermentation
Candida shehatae, *Pichia stipitis*, Ethanol production; 360
Pachysolen tannophilus, Oxygen, Redox potential; 503
Pachysolen tannophilus, Pentose phosphate pathway; 353
D-Xylose isomerase
Streptomyces violaceoruber, Bivalent cations; 696
Xylosidase
Xylanase, Larchwood, Oat spelt; 373
β-D-Xylosidase gene
Molecular cloning, *Bacillus polymyxa*; 677

Yeast cells immobilized
Alginate, D-Glucono-1,5-lactone, Internal gelation; 145
Fermentation, Gel entrapment, Internal gelation; 737
